Ursus™ seat is a modern, safe and functional solution for patients, which prefers a high comfort and stabilization. TILT-IQ® function, Tilt-in-space ClickClack® are some of many practical solutions of URSUS SYSTEM™

- **Outdoor frame Ursus™** Means tours and travels in very comfortable conditions either for a child and caregivers. It provides a convenient ride in varied terrain. Swivel front wheels ensure smooth changing of direction.

- **Hi-Low frame Ursus Home™** is a comfortable and functional solution in home conditions. Adjustable seat height greatly facilitates contact with peers, and push handles make maneuvering, even in tight spaces, much easier.

- **Active frame Ursus Active™** is a mode that gives your child a freedom of movement. Thoughtful solution enables independent movement of the user or with assistance of a caregiver. Now, therapy, learning, and fun will be even more enjoyable and effective.

- **Pneumatic Hi-Low frame Quark™** Will convert URSUS™ seat into a comfortable rehabilitation chair. Innovative system of height adjustment ensures smooth and easy operation. Included push handle allows easy relocation of the device.

---

**BREATHTABLE UPHOLSTERY ATMO™**

**WATERPROOF UPHOLSTERY HYDRO™**

Choose your upholstery
Ultralight stroller **URSUS™** is designed for daily rehabilitation of children with locomotor disabilities. As far as its construction is concerned, the frame and seat are made of high-strength aluminum, and the chassis is additionally cushioned. **Ursus™** is equipped with **ClickClack©** feature, which means that you can easily swap the seats and adjust the stroller to the most suitable mode. The device has a wide range of adjustments such as width, seat depth, backrest height, backrest tilt angle, infinitely adjustable tilt-in-space function – **TILT-IQ©**, reversible seat. **Ursus™** has also been equipped with spatial, breathable upholstery that prevents excessive sweating as well as bedsores, and more to the point, positively influences the comfort of use. Moreover, the stroller can easily be converted into a lounger so that the child can sleep in it.

The product is available in 3 different sizes with a very wide range of accessories that will help you to meet the individual needs of user.

**IT IS RECOMMENDED IN THE FOLLOWING CASES:**

- Infantile cerebral palsy – different forms.
- Meningomyelocele.
- Brain and spinal cord injuries.
- Muscle diseases connected with paresis and paralysis.
- Genetic disorders connected with paresis.
- Other diseases connected with paresis, paralysis and injuries regarding locomotor system.
- After traumatic brain injury, spine with spinal cord and lower limbs injury.

---

**STANDARD EQUIPMENT:**

- Light aluminium frame
- Fully foldable
- Wheels with glass fiber, front PU swivel with direction / blockade, Rear inflatable with 2 separate wheel brace
- Front shock absorbers
- Ergonomic folding system
- Seat unit with ClickClack© system for easy plug in/out
- 1 piece style height adjustable push handle
- Reflective safety marks
- Seat unit that can be used forward or rearward facing
- Fully reclining backrest to make the stroller as a bed
- Height adjustable backrest
- Angle adjustable backrest
- 5-points safety belts with height adjustment
- Adjustable headrest
- Anatomical lateral supports
- Depth and width adjustable seat
- Pneumatic tilt-in-space system **TILT-IQ©**
- Height and angle adjustable footrest
- 5 points feet stabilizing belts with heel support and foot
- abduction-adduction adjustments
- Angle adjustable footplate
- Soft upholstery with spine load reducing and ventilating
- Soft front bar with reflective safety marks

---

Stroller is equipped with Light Grey rims. However there is possibility to change the rim’s colour to black.

**URSUS HOME™** is the perfect stroller designed for daily rehabilitation of children with locomotor dysfunction. Stable construction and an extensive system of supports and belts makes children feel very confidently and safely in **URSUS HOME™**. Consequently, the small patient is able to take a meal, play, learn and perform the therapy exercises in seating or half-lying position. Caregivers can easily change the seat height. Angle adjustment of the backrest, seat, and footrest allows your child to rest in supine position.

A particular advantage that will be appreciated by therapist is infinitely adjustable tilt-in-space function. Rich equipment and wide range of adjustment makes **URSUS HOME™** fit easily to the needs and dysfunctions of the child.

The compact construction of the stroller is perfect for small and tight spaces. Thanks to the ClickClack© system we can quickly detach the seat and attach it to the other products that are in our offer (**Ursus™, Ursus Home™, Ursus Active™**). The **URSUS™** seat is available in 3 sizes.

IT IS RECOMMENDED IN THE FOLLOWING CASES:

- Cerebral palsy – various types and forms.
- Brain and spinal cord injuries with lower limbs paralysis and weakness, balance and motor coordination disorders with different etiology.
- Demyelinating disease (e.g. multiple sclerosis – SM).
- Meningocele.
- Muscles diseases with weakness and paralysis (dystrophy, myasthenia gravis, myositis).
- Genetic disorders.
- Degeneration and neurological diseases.
- Other condition connected with muscles weakness, paralysis and musculoskeletal disorders.
- After head and spinal cord injuries and spine trauma with paralysis and paresis.

**STANDARD EQUIPMENT:**

- Adjustable headrest | Anatomical lateral supports | 5-points safety belts with height adjustment | Height adjustable backrest | Angle adjustable backrest | Depth and width adjustable seat | Pneumatic tilt-in-space system tilt-iQ© | Height and angle adjustable footrest | 5 points feet stabilizing belts with heel support and foot | abduction-adduction adjustments | Soft upholstery with spine load reducing and ventilating | function | Soft front bar with reflective safety marks | Hi-low frame equipped with castors with brakes and push | handle

**URSUS ACTIVE™** is a special wheelchair designed for daily rehabilitation of children with locomotor dysfunctions. Furthermore, this wheelchair may be very useful concerning orthopaedic disorders and lower limbs relief needed after surgery.

The wheelchair is equipped with anti-tippers wheels that prevent the patients to tip over backwards. Optionally, **Ursus Active™** can also be equipped with push handles for a caregiver.

Tilt-in-space function allows you to smoothly adjust the tilt angle of the seat which helps you to relief hips by moving the weight of body from pelvis area to the back.

Thanks to the ClickClack© system we can quickly detach the seat and attach it to other products that are in our offer (Ursus™, Ursus Home™, Ursus Active™, Quark™).

**IT IS RECOMMENDED IN THE FOLLOWING CASES:**

**Note:** Measurement tolerance range is +/- 1 cm / ½ in.

*The value cannot be the main factor for selection of product size.*
**Firm headrest**
Made of poliurethane foam. Provides with basic support of the head.

**Head-neck support**
Perfectly stabilizes the head. Indicated for people with limited head control. You can mount it at different height.

**Thigh abduction belts**
They can be easily attached to the chair by use of Velcro straps. Their use allows to keep legs in abduction and also prevents the patient from slipping off of the device.

**Pelvic belt**
Wide belt equipped with “HOLD AND PULL” system. It provides better stabilization in the device.

**4 point vest**
It acts as a trunk stabilizer. Wide range of adjustment helps to fit it to the user’s needs. Equipped with HOLD&PULL® system.

**6 point vest**
Wide range adjustable vest that acts as a trunk stabilizer. HOLD&PULL® system makes it easier to adjust the vest to the patient body.

**Patient lift belt**
Robust and ergonomic design as well as high durability facilitates daily care of the patient.

**Soft cover for tray**
Soft cover protects the user from hitting the tray. Indicated for patients with impaired limbs coordination.

**Led lights (2 pieces)**
Front and rear LED lights for increased safety.

**Lesser side covers for head**
They provide additional head protection from unwanted contact with stroller’s frame. Mounted around the push handle.

**Safety**

**H vest**
It acts as a trunk stabilizer. HOLD&PULL® system makes it easier to adjust the vest to the patient body. You can quickly detach the vest if necessary.

**Soft cover for tray**
Soft cover protects the user from hitting the tray. Indicated for patients with impaired limbs coordination.

**Stabilization**

**Pelvic belt**
Wide belt equipped with “HOLD AND PULL” system. It provides better stabilization in the device.
Trunk stabilizing belt
It acts as an additional trunk protection which helps to keep a proper sitting position. The belt is fastened by use of Velcro straps and its size can be adjusted to the user.

Trunk belt
Universal solution applicable to many of our products. It secures the user from falling out of the device. Anatomical shape and Velcro straps allow for a comfortable fit.

Abduction block
Shaped abduction block provides with correct seating position. Can be easily removed.

Lumbar support
It allows better stabilization of the lumbar back.

Trunk stabilizing belt
It acts as an additional trunk protection which helps to keep a proper sitting position. The belt is fastened by use of Velcro straps and its size can be adjusted to the user.

Lumbar support
It allows better stabilization of the lumbar back.

BodyMap Stabilization

BodyMap A seat cushion
Vacuum seat cushion allows for stabilization and proper positioning of hips.

BodyMap B Backrest cushion
The vacuum back cushion provides comfort and correction for patients with scoliosis and poor posture. Cushion maintains and controls required posture in the stroller.

Seat narrowing cushions 3cm
Made of elastic foam trimmed with soft material. They are attached to the seat upholstery from both sides. Thanks to them you can narrow the seat by 6cm.

Seat narrowing cushions 5cm
Made of elastic foam trimmed with soft material. They are attached to the seat upholstery from both sides. Thanks to them you can narrow the seat by 10cm.

Abduction block
Shaped abduction block provides with correct seating position. Can be easily removed.

Lumbar support
It allows better stabilization of the lumbar back.

Trunk stabilizing belt
It acts as an additional trunk protection which helps to keep a proper sitting position. The belt is fastened by use of Velcro straps and its size can be adjusted to the user.

BodyMap Stabilization

**Comfort**

**Umbrella**
Attachable to the stroller’s frame, perfectly protects from the sunlight or rain.

**Tray**
Made of plastic. It supports the therapy and allows you to play, eat, and work.

**Folding canopy without side panels**
Protects against both sun and rain.

**Folding canopy with side panels**
Side panels protect not only against sun and rain but also the wind.

**Cup holder**
An universal holder mounted to the frame. It enables easy and quick access to a bottle of drink.

**Headrest cover**
It helps to keep the headrest clean. Easy to assemble/disassemble, it can be washed.

**Summer sleeping bag**
Protects legs and trunk. This esthetic body sheet fits the height of the user covering also the footrest of the pushchair.

**Winter sleeping bag**
Protects legs and the torso area. A very tasteful cover of the body, adjusting to the height of the user, covering the footrest of the chair. Insulated lining provides extra protection against the cold.

**Winter hood**
Can be attached to the sleeping bag. Protects head against frost, wind and moisture.

**Plexiglas® Tray**
Made of Plexiglas®. It supports the therapy and allows you to play, eat, and work.

**Rain Cover**
An excellent protection from the rain, snow, and wind either for the user and stroller.

**Mosquito Net**
Excellent protection against insects.

**Wheel covers (4 pcs.)**
Use it on the dirt tires when you want to take the products indoor or transport in the trunk.

**Decorated spokes guard**
Spokes guards 20", made OF polycarbonate 1,5mm, outsider diameter 415mm, inner de diameter 100mm.
Storage

Storage basket
Enables you to carry small objects while you stroll. It is attached to the base of the stroller.

Women’s bag
This capacious bag designed for mothers will be perfect for carrying all the necessities.

Men’s bag
Capacious men-style bag for carrying all the necessary things.

Delux bag
Large, durable and stylish bag useful for carrying necessary things. Made from high-quality materials.

Oxygen tank case
Oxygen tank case can be attached to the stroller by use of Velcro straps with adjustable length. Made to measure to perfectly fit the patient’s oxygen tank.

Stroller cover ‘n carry bag
Perfect solution to protect folded stroller against damage (e.g. during transport). Easily fits the shape and the size of a stroller.

Stroller cover for the kid-sits
An excellent protection from the rain, snow, and wind either for the user and stroller

Conversion kit (for The buggypod kit-sits)
Set of elements thanks to which the Buggypod kit-sit can be converted into a fully functional stroller.

Mounting set
It enables easy assembly of the Buggypod kit-sits to other strollers whose frame diameter is larger than 40mm.

Build-up

Extension bar
An adapter enabling to mount the Buggypod kid-sits to the strollers of other manufacturers.

Conversion kit (for The buggypod kit-sits)
Set of elements thanks to which the Buggypod kit-sit can be converted into a fully functional stroller.

Rain cover for the kid-sits
An excellent protection from the rain, snow, and wind either for the user and stroller

Kid-sit buggypod IO
For convenient and safe transportation of a second child without having to buy a double stroller. The buggypod IO has been designed so that within a few seconds, it can be folded, unfolded, or completely disassembled. 5 point belts seat and folding footrest provide the child with comfort and safety. Using the conversion kit, you are able to convert the kid-sit into an independent three-wheeled stroller. Load capacity up to 20kg.
