JUMBO™

positioning chair

JUMBO™

positioning chair

akces-med.com

Positioning chair **JUMBO™** is used for initial upright standing of children in the sitting position.

It is made of ecologic wood and therefore it is eco-friendly.

Despite its simplicity, it perfectly fulfils its function. It is safe for spastic as well as flaccid children with decreased muscle tone. Adjustable side supports help in correcting postural problems and, moreover, this chair may be beneficial regarding orthopaedic disorders.

It has a safety vest which is equipped with innovative **"hold & pull"™** system thanks to which the child is both quick and precisely secured in this chair.

Each product is hand painted on water base paints. Size 3 thanks to the quick folding system of the footrest makes it easy to place and remove the person from the chair.

IT IS RECOMMENDED IN THE FOLLOWING CASES:

- Cerebral palsy – various types and forms.
- Brain and spinal cord injuries with lower limbs paralysis and weakness, balance and motor coordination disorders with different etiology.
- Demyelinating disease (e.g. multiple sclerosis – SM).
- Meningocele.
- Muscles diseases with weakness and paralysis (dystrophy, myasthenia gravis, myositis).
- Genetic disorders.
- Degeneration and neurological diseases.
- Other condition connected with muscles weakness, paralysis and musculoskeletal disorders.
- After head and spinal cord injuries and spine trauma with paralysis and paresis.

STANDARD EQUIPMENT:

Safety

SLK_002 Patient lift belt
Robust and ergonomic design as well as high durability facilitates daily care of the patient.

SLK_003 Soft cover for tray
Soft cover protects the user from hitting the tray. Indicated for patients with impaired limbs coordination.

SLK_015/016/020 TANGO Wheel with brake
Noiseless, easy to maintain, does not leave marks, does not corrode.

Positioning

SLK_101 Thigh abduction belts
They can be easily attached to the chair by use of Velcro straps. Their use allows to keep legs in abduction and also prevents the patient from slipping off of the device.

SLK_102 Head supporting belt
Attachable to the headrest by use of Velcro straps. Used for people with limited control of the head to prevent its falling.

SLK_104 HexagonPro™ Headrest
Headrest adjustable in three dimensions. Due to its special design, it can be precisely adjusted to the user's needs.

SLK_114 H Harness
It acts as a trunk stabilizer. HOLD&PULL™ system makes it easier to adjust the vest to the patient body. You can quickly detach the vest if necessary.

SLK_123 Extended headrest
For patients with increased head circumference. It provides better side stabilization.

SLK_125 6 points safety vest
Wide range adjustable vest that acts as a trunk stabilizer. HOLD&PULL™ system makes it easier to adjust the vest to the patient body.

SLK_161 Sandals stabilizing feet and ankles
They protect and stabilize the ankle joint. They are made of elastic material, recommended for users with increased muscle tone. They can be used with or without shoes.

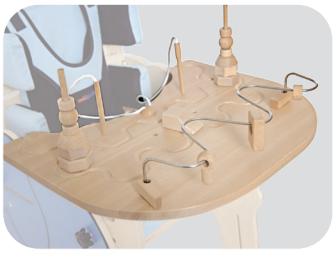
Comfort



SLK_401 Tray for manual therapy
The tray allows active exercises assisting upper limbs with a particular focus on palm function.

SLK_403 Tray
Made of wood. It supports the therapy and allows you to play, eat, and work.

SLK_429 Soft footrest cover
Comfortable pad, protecting the feet from direct contact with the footplate

SLK_431 Push Handle

SLK_448 Lap tray

BodyMap Positioning

SLK_340 HexagonPro™ BodyMap Headrest
New version of HexagonPro™ BodyMap headrest with HexagonPro™ and BodyMap cushion. Such a combination guarantees perfect fit and stabilization of the patient's head.

Storage

SLK_507 Oxygen tank case
Oxygen tank case can be attached to the stroller by use of Velcro straps with adjustable length. Made to measure to perfectly fit the patient's oxygen tank.
