PRODUCT BROCHURE

/SPECIAL NEEDS STROLLERS

CREATED FOR YOUR CHILD

HARMONY™ is a special needs stroller designed for children with musculoskeletal dysfunctions. It has the most important features of a therapeutic special needs stroller, while not resembling one at all. Thanks to its proven technical solutions, it is safe, stable and at the same time very comfortable.

HARMONY™ provides a high degree of stability and fit. The length-adjustable backrest, seat and single-column footrest allow the stroller to be properly adjusted to the child's height. The head stabilizer, along with trunk and hip supports, secure the little user's body by providing lateral stabilization. The comfortable multifunctional seat has a front-to-back option. This gives the child the possibility of sitting facing forward while observing the surroundings or backward while maintaining eye contact with the caregiver. The tilt-in-space function allows you to smoothly adjust the tilt angle of the entire seat.

MD Class I Medical Device

/SPECIAL FEATURES

A proper stabilization of the user is provided by a wide range of standard equipment.

Adjustable suspension. There are two modes to choose from: City and Comfort.

Footrest with height and tilt angle adjustments, 5-point belts fastening the feet

The front swivel wheels with blockade make it easier to maneuver the stroller in tight and narrow spaces.

/TILT IN SPACE FUNCTION

The tilt-in-space function can be achieved quickly and without much effort.

/REVERSIBLE SEAT

There is the possibility of putting the seat in the forward or rearward facing position, depending on the needs of the child.
