SICURO™

Positioning chair

SICURO™ is an innovative rehabilitation seat designed to provide full comfort and postural support while ensuring mobility for the user. It facilitates everyday activities, making them more accessible for both children and their caregivers. The seat's functional design allows it to be used both on the floor and on a standard chair, making it a versatile solution for various daily tasks and playtime activities. Special cut-outs in the lateral supports and an openwork backrest enhance air circulation, which increases user comfort, helps prevent pressure sores in areas of high contact, and reduces moisture build-up by ensuring continuous ventilation of the body.

COMFORT™ upholstery
Durable and comfortable

Loft **Moon** **Onyx** **Rose**

The reclining function allows the seat to be set in a semi-lying position, providing the child with comfort during rest and relieving the body during extended use.

The seat features smooth tilt-in-space adjustment with a reclining backrest. This functionality is especially important for pressure relief and pressure sore prevention.

130 - 160 cm
Indicative user height
